Education

08/2023 – Present
Fort Wayne, Indiana

Purdue Fort Wayne, Information Systems

A rigorous program combining computing fundamentals with business and organizational contexts, designed to equip students with the technical, analytical, and project-management skills needed to design, deploy, and manage information systems.

Professional Experience

07/2024 – 03/2025
Fort Wayne, Indiana

IT Technician, Deister Machine Company

reset, configured, and deployed hardware—including desktops, laptops, thin clients, and peripherals—across multiple departments and warehouse locations, ensuring compatibility with company-standard images and stable connectivity. I assisted employees by resolving help desk tickets, troubleshooting software, network, and hardware issues, while also securely recycling decommissioned systems and maintaining organized asset tracking. Additionally, I shadowed the Systems Administrator to gain hands-on experience in server management, Active Directory, and broader infrastructure support.

06/2023 – 07/2024
Fort Wayne, Indiana

IT Technician, M6 Networks

I assisted local and national businesses—including Walmart, McDonald's, Dunkin', and the Social Security Administration—with hardware installation, configuration, and integration into existing infrastructures. This included deploying POS systems, TV displays, drive-thru communication systems, VoIP phone systems, and security camera hardware, ensuring full functionality and reliability. I collaborated directly with clients to deliver tailored IT solutions and provided post-installation support to maintain smooth operations.

Skills

- | | | | |
|------------------------------------|--|---------------------------------|---------------------------------------|
| • Windows & Azure Active Directory | • Group Policy Management | • Domain/DNS/DHCP Configuration | • Patch Management & System Updates |
| • VPN/Firewall Setups | • VLANs, Routing, Switching Concepts | • Network Monitoring Tools | • Windows/Linux Server Administration |
| • Cloud Platforms (Azure, AWS) | • Data Backup, Recovery, and Disaster Recovery | • ITSM | • Microsoft 365 Administration |
| • VMWare, vSphere, VMs | • Team Collaboration & Communication | | |

Projects

Virtual Machine Linux Distribution Lab

Deployed and configured multiple Linux distributions (Ubuntu, CentOS) within a virtualized environment. Installed and utilized tools such as Wireshark, Nmap, and system monitoring utilities to practice packet analysis, network troubleshooting, and server administration. Documented lab setups to simulate real-world system admin tasks.

Personal Website with Countdown Features

Built a responsive website using HTML, CSS, and JavaScript to display a countdown timer for birthdays and personal goals. Integrated dynamic updates and clean UI design to track milestones. Demonstrated front-end development skills and version control using GitHub.

Professional IT Writings Portfolio

Created a portfolio of business-focused IT communications, including how-to guides, memos, and internal documentation. Designed content to reduce common IT support requests, improve employee tech adoption, and demonstrate strong written communication skills for technical audiences.

Systems Administration Portfolio Site

Developed and maintain a personal website showcasing projects, certifications, and IT-focused content. Designed to highlight hands-on experience with system administration, networking, and home lab projects, while serving as a professional brand platform.
